Appendix B: SMBKC Stock Assessment Input Files

The data file used for the reference model (16.0) control file:

```
#=================================================================================================================
# Gmacs Main  Data  File  Version 1.1:  SM17 example
# GEAR_INDEX   DESCRIPTION
#    1        : Pot fishery retained catch.
#    1        : Pot fishery with discarded catch.
#    2        : Trawl bycatch
#    3        : Fixed bycatch
#    4        : Trawl survey
#    5        : Pot survey

# Fisheries:  1 Pot Fishery,  2 Pot Discard,  3 Trawl by-catch, 3 Fixed by-catch
# Surveys:    4 NMFS Trawl Survey, 5 Pot Survey
#=================================================================================================================

1978  # Start year
2017  # End year
2018  # Projection year
5     # Number of seasons
5     # Number of distinct data groups (among fishing fleets and surveys)
1     # Number of sexes
1     # Number of shell condition types
1     # Number of maturity types
3     # Number of size-classes in the model
5     # Season recruitment occurs
5     # Season molting and growth occurs
4     # Season to calculate SSB
1     # Season for N output
# size_breaks (a vector giving the break points between size intervals with dimension nclass+1)
90  105  120  135
